

TRADEMARK INVESTIGATIONS

How do you confirm your suspicions and address the issue of misuse and misrepresentation of a company's intellectual property, corporate and product logos and services?

At AFI International we have the expertise in conducting investigations on behalf of companies, lawyers and trademark agents regarding trademark violations and infringements of various kinds. In addition, we conduct discreet surveillance, gather physical evidence of trademark violations and provide online and physical due diligence investigations presenting the evidence to our clients for court proceedings, ensuring accuracy and chain of evidence.

Furthermore, we have the ability to conduct due diligence searches for companies wanting to register names and logos ensuring they are not currently in use in some form.

PROTECT YOUR CLIENT'S BRAND
